Errors

1. config/config.config.ts

    1.1. The specified website ('http://automationpractice.com/index.php') is inaccessible.

   ## ecbiz312.inmotionhosting.com

    ### Your IP is 109.201.252.41

2. package.json

    2.1. This command generates an empty Allure report:

3. cypress/fixtures/users.json

    3.1. In the "wrong_email_format" section of the fixture, the "password" field should contain the correct password.

Comments

1. .github/workflows/cyAllureRun.yml

    1.1. In Git Actions, it's preferable to use 'runs-on: ubuntu-latest' instead of 'runs-on: ubuntu-20.04' for specifying the operating system.

2. config/config.config.ts

    2.1. It's advisable to rename this file from 'config/config.config.ts' to something like 'config/cypress.config.ts' for better clarity and naming convention.

    2.2. It's advisable to remove comments.

3. cypress/e2e/pages

    3.1. The 'pages' folder should be on the same level as the 'e2e' folder.

4. cypress/e2e/pages/loginPage.ts

    4.1. All assertions and validations should reside within the test files, not within the page objects.

5. cypress/e2e/pages/myAccountPage.ts

    5.1. All assertions and validations should reside within the test files, not within the page objects.

6. cypress/e2e/tests/login.test.ts

    6.1. Add an empty line before each "it" statement for better readability.

6.2. Remove the 'login with valid credentials' test as it replicates the subsequent test titled 'login with valid credentials read data from fixture'

7. cypress/e2e/tests/myAccount.test.ts

7.1. The file should be deleted as it doesn't contain any tests related to the website specified in the config file.

8. README.md

8.1. The description in the README.md file lacks clarity regarding the step "Change 'Username' and 'Password'".
